7/10/24 EXP NO: 10

INTERNETWORKING USING CISCO PACKET TRACER

Aim

to design & configure internetworking using cisco packet tracer.

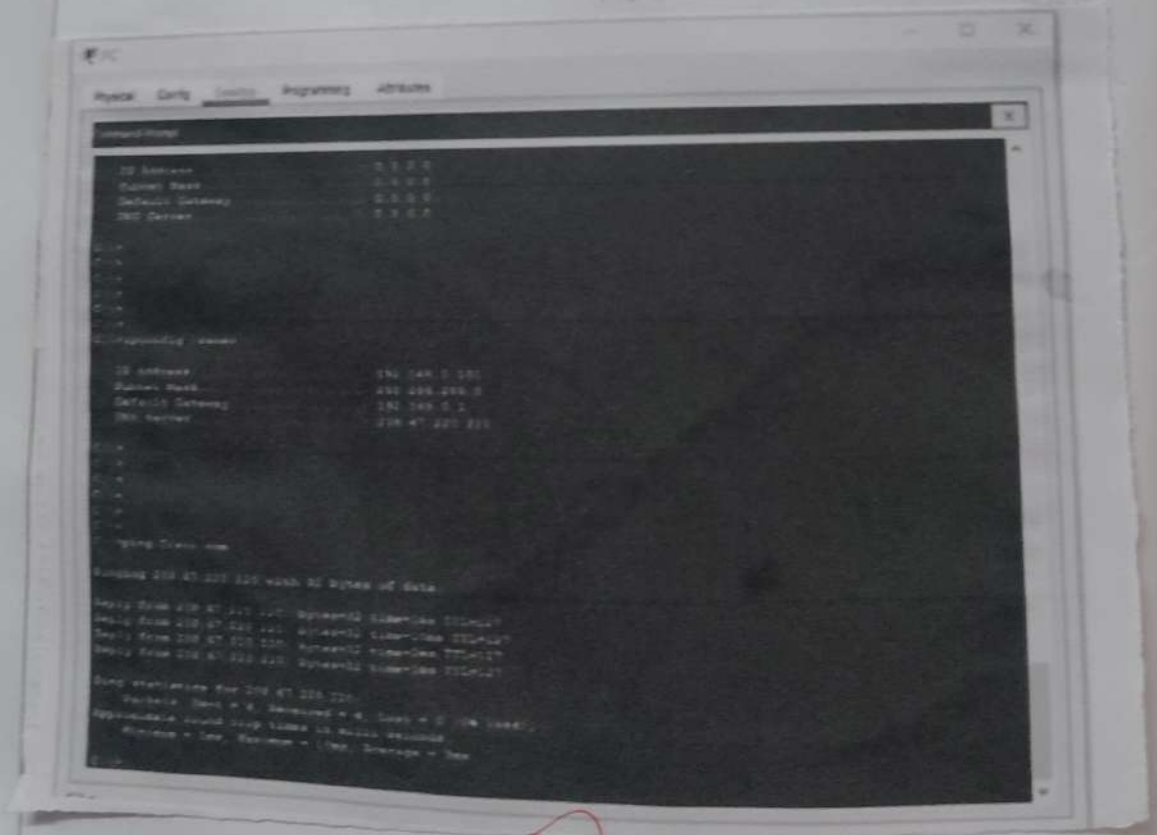

Requirement

- cisco packet tracer
- router
- pcs
- wireless router
- laptop
- cable modem
- internet cloud
- sensor
- ethernet cables

Procedure

- create required topology
- connect pcs to router & config
- enable router interface
- confic wireless router
- enable DHCP
- config server for DHCP & DNS
- test using ping

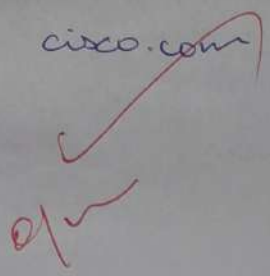

Verification

ipconfig/release

ipconfig/renew

ping cisco.com

Program

router config

enable
config t
interface fa 0/0
ip address 192.168.10.1
no shutdown
interface fa0/1
ip address 192.168.20.1
no shutdown

IP config

Device	IP Address	Gateway
PC0	192.168.10.2	192.168.10.1
PC1	192.168.20.2	192.168.20.1

Result

Thus the internetworking using cisco packet tracer is implemented successfully.
