15/7/26 EXP NO: 1

STUDY OF VARIOUS COMMANDS USED IN LINUX AND WINDOWS

Aim

To study about various networking commands on Linux operating system

Basic Linux Commands

1. pwd - print current working directory
2. mkdiv - create a new directory
3. cd - change the current directory
4. touch filename.txt - create an empty file
5. echo "Hi" > filename.txt - write "Hi" to given file, overwriting any existing content using echo.
6. cat filename.txt - display contents of the given file
7. grep - search for a specific pattern in a file or output.
8. klc - display word, line and byte counts for a file.
9. wc.l - count the number of lines in a file
10. wc.w - count the numbers of words in a file
11. wc.c - count the number of bytes in a file
12. wc.L - display the length of the longest line in a file

Basic Networking Commands

1) hostname - Display the systems host name
2) route - display or manipulate the IP routing table.
3) netstat - show network connections, routing tables and interface statistics
4) ip address show - displays ip address
5) startup: finds the ip address of a domain
6) ping: tests connectivity to a host
7) arp - display the app cache
8) traceroute - displays the route taken by packets to reach a ~~destination~~ destination

Result:

The basic linux and networking commands were executed successfully.
